FOR IMMEDIATE RELEASE:

**NEW JENN-AIR® PRO-STYLE® RANGE COLLECTION
FEATURES ADVANCED LCD SCREEN FOR ENHANCED USABILITY**

CHICAGO (April 16, 2010) – Jenn-Air, the brand that introduced downdraft ventilation and other cooking innovations, will debut this fall a collection of Pro-Style® gas and dual-fuel freestanding ranges equipped with high powered, precision burners and advanced 7-inch color LCD touch screens designed to help cooks get the most out of the oven’s industry leading performance. Offering enhanced usability, the “touch anywhere” screen provides easy access to a host of features organized in an intuitive tab format.

Whether baking, broiling or roasting, the new Jenn-Air® Pro-Style® ranges give cooks the power and versatility to achieve great results. A 20,000 BTU PowerBurner, the highest in the industry,* provides all the power needed for high-temperature cooking. Burners feature electronic Ignition and Flame-Sensing Reignition™ so cooks can rest assured that their burners will light and stay lit. A Dual-Fan Multimode® True Convection System uses two fans to generate even air flow throughout the oven when using any of six different convection cooking modes. To provide peace of mind when family or guests are running late, a Keep Warm™ option maintains gentle warming temperatures for up to 30 minutes.

“Whether renovating or looking for a replacement model, these new ranges give those in the market for luxury appliances a number of high performance options,” said Juliet Johnson, manager of Jenn-Air brand experience. “And they provide a level of performance far beyond anything Jenn-Air brand has ever offered.”

Available in dual-fuel and gas configurations, the ranges offer proven, best-in-class cooking performance. Dual-fuel ranges feature electric ovens that include a 2,800-watt convection element, a 3,000-watt hidden bake element, and closed-door broiling with full and center settings to accommodate cooking both large and small dishes. Ovens on the gas ranges have a 1,200-watt convection element, 11,000 BTU broiler burners and a 17,000 BTU hidden bake burner for optimal cooking performance.

Additional oven features on both the dual fuel and gas models include a “My Creation” function that allows cooks to program the cooking method, time and temperature of successful recipes and recall them when repeating the recipe. An auto convection conversion translates conventional cooking times to convection times.

“The unique features and innovative technology of these new Jenn-Air® ranges are sure to surprise and delight even the most advanced home cook,” Johnson said. “Their powerful convection systems combined with the latest technology help cooks to confidently control that power and achieve exquisite results.”

Both the gas and dual-fuel ranges are available in 30, 36, and 48-inch models. The dual-fuel and gas 36-inch ranges are available with either six sealed burners or four sealed burners with a powerful 1,320-watt even temperature griddle designed for easy cleaning. The 48-inch ranges come equipped with six-sealed burners and an electric griddle. All rangetops in the collection feature at least one 20,000 BTU PowerBurner along with 15,000 BTU burners and a 5,000 BTU simmer burner that reduces to an ultra-low 500 BTUs.

Premium details found throughout the collection include heavy-duty racks, extendable roller rack with handle, Sabbath mode, CustomClean™ Self-Cleaning with adjustable levels and automatic lock. The Pro-Style® stainless design includes oversized stainless steel knobs and a handle with diamond etching for a sure grip and added styling.

Since the introduction of the first self-ventilated cooktop in 1961 and downdraft ventilated range in 1965, Jenn-Air brand has consistently grown its reputation as a technology and design innovator. Its selection of style options includes two distinct stainless steel collections and two cutting edge finishes: Floating Glass and Oiled Bronze. From downdraft cooktops, wall ovens and professional-style ranges to dishwashers, refrigerators and such entertaining essentials as warming drawers, built-in ice machines and wine cellars, Jenn-Air brand offers a complete line of major kitchen appliances.
